

Information Sheet 2

GRAIN DIRECTION DIAGRAM

When joining the **EDGE** of the stock, check the grain direction of the **SIDE** of the work piece.

When jointing the **SIDE** of the stock, check the grain direction on the **EDGE** of the work piece.

NOTE: When the cutter head is below the stock, as on the jointer, the knives will *exit* the stock toward your feet. The wood grain should be oriented in the same general direction
